LETTER OF RECOMMENDATION

This letter of recommendation is to support Ms. Rhea Joel Dcunha applying to the master's program at your esteemed university. As the Professor and Head of the Department of Public Health Dentistry I have observed her exemplary academic achievements, research acumen, passion for community service and remarkable leadership skills for the last three years.

Rhea is a diligent, sincere and promising student who has consistently excelled academically, ranking among the top students in our college. Her outstanding academic achievements have earned her the esteemed TATA Trusts Medical and Healthcare Scholarship for three consecutive years. Furthermore, she stands out as one of the 15 students selected in India to receive the prestigious Pierre Fauchard Academy Award, she was also nominated for the "Best Undergraduate Student of the Year (Intern)" at the Indian Dental Divas highlighting her exceptional dedication and success in the field.

Rhea's active involvement in publications have honed her research skills and instilled a passion for contributing to healthcare through evidence-based practices. She has exhibited a profound commitment to community service by participating in oral health screening and dental treatment camps at our public health centers that showcase her dedication to addressing healthcare disparities. Whether leading a team of peers in a research endeavor or coordinating community outreach efforts, she has consistently exhibited great levels of leadership.

Rhea's paper presentation on "First Bite Syndrome" broadened the understanding of the condition and she secured the 1st position at MAGNUM. Similarly, her E-Poster presentation on "Digital Impressions in Dentistry" at Dentocon-3, Seema Dental College which showcased her remarkable ability to integrate cutting-edge technology into dentistry earned her the 1st position. I have observed her impressive ability to articulate ideas with precision during various seminars and presentations, showcasing her strong communication skills and confidence. Her capacity to foster collaboration is evidenced by her involvement as the Scientific Co-Head in the College Working Committee and as a member in the College Student Council.

I am positive that with a strong academic foundation, research expertise and track record of accomplishments that Rhea possesses, the master's program will provide her with the necessary platform to enhance her skills, broaden her perspective and empower her to contribute meaningfully to the field of public health.

Dr. Vaibhav Thakkar

MDS (Public Health Dentistry),

Reader and Head, Dept. of Public Health Dentistry,
