To Whom It May Concern,

I am thrilled to write this letter of recommendation in enthusiastic support of **Rhea Dcunha's** application to join your organization. I am a Clinical Associate Professor in the Department of Epidemiology at Boston University School of Public Health (BUSPH). I have gotten to know Rhea well over the past year in several roles. I serve as Rhea's faculty advisor in the master of public health (MPH) program at BUSPH. Rhea was a teaching assistant (TA) for my Fall 2025 Quantitative Methods in Public Health course. Additionally, I have worked with Rhea closely to plan an upcoming Hackathon for Health Equity event over the past month. I have been a faculty member in schools of public health for over a decade, where I have worked with hundreds of graduate students. For this reason, I feel I am able to speak to Rhea's qualities as a student and researcher. Given the qualities I have observed in the time I have known Rhea, I am certain that she would make an incredibly valuable contribution to your research team.

Rhea stands out as one of the brightest and most diligent students I have known in my career. She approaches all tasks with the utmost professionalism. She is respectful to all and works well with others. As a TA in the fall, Rhea held weekly office hours and worked with two other TAs to grade all course assessments. She coordinated seamlessly with her colleagues, provided valuable guidance to students in the class, and completed tasks quickly and with the greatest attention to detail. Rhea was able to work independently but reached out to me for clarification when needed with questions that reflected her strong grasp of the material and excellent critical thinking skills.

Rhea is highly organized, reliable, and shows a remarkable ability to juggle multiple tasks concurrently. In our meetings regarding the hackathon event – which brings undergraduate and graduate students together to apply quantitative methods to health equity-related questions – Rhea takes notes carefully and follows up with summary notes, which has been incredibly helpful. In this role, Rhea has also demonstrated her ability to solve problems on her own and complete tasks very quickly and accurately. I am constantly impressed with Rhea's work ethic, creativity, and positive demeanor.

The qualities I describe above speak to Rhea's strengths in professional environments and her extraordinary potential as a researcher. She would make a fantastic addition to any research team, and **she has my strongest recommendation for this position.**

Please do not hesitate to reach out with any questions or for additional information.

Best regards,

A handwritten signature in dark ink, appearing to read "Emily Goldmann", with a long horizontal flourish extending to the right.

Emily Goldmann, PhD, MPH

Clinical Associate Professor, Department of Epidemiology | Faculty Director, Online MPH Program
